Ad Astra-Kevin O. McLaughlin 2016-08-26 In 2034, the Earth is in crisis. Energy use is at an all-time high, and energy-hungry nations seem on the verge of going to war with one another. But on the moon a discovery is made, something that changes the balance of everything. A set of caves is opened by explorers, revealing a buried base thousands of years old. Among the relics found is the ruin of an ancient starship, with an engine capable of carrying humanity to the stars - or becoming the golden apple that starts a war no one can win. A handful of unlikely heroes will risk their lives to keep the starship safe. If life knocked you down, would you risk everything you had left to reach for the stars? Excerpt: "Dan - ad astra!" Dan heard the order. Ad astra. To the stars. It was a toast the two of them had shared back in college, when they first stepped onto the roads which would lead them into space. It had been John's idea to use the toast as a code word now. Dan didn't even take a deep breath before executing the order. He'd practiced this with Majel enough times in the simulator - not the part about having a gunman in the bridge, but if that order was ever given, it would be a true crisis. He checked the screen again. Visual range in only fifteen seconds. No time for anything else. He rapidly initiated the program, said a quick prayer, and pressed the Enter buton on his keyboard. Immediately, the ship began to shudder." The story continues in book two "Stellar Legacy" and book three "Deep Waters"

Ad Astra-Kevin McLaughlin 2018-10-03 Dan Wynn wanted to explore space more than life itself, but a tragic accident left him too injured for NASA's space program. Second chances don't come along every day, so when an old friend offered him one, he grabbed on with both hands. The next thing Dan knew, he was on the moon, piloting humanity's first starship while fighting his way through one peril after another. Little did Dan know that simple offer was anything but, and would lead him to the stars far beyond our own. The risks are great. But if life knocked you down, what would you gamble to have one more shot at your dreams? Excerpt: "Dan - ad astra!" Dan heard the order. Ad astra. To the stars. It was a toast the two of them had shared back in college, when they first stepped onto the roads which would lead them into space. It had been John's idea to use the toast as a code word now. Dan didn't even take a deep breath before executing the order. He'd practiced this with Majel enough times in the simulator - not the part about having a gunman in the bridge, but if that order was ever given, it would be a true crisis. He checked the screen again. Visual range in only fifteen seconds. No time for anything else. He rapidly initiated the program, said a quick prayer, and pressed the Enter button on his keyboard. Ad Astra-Jack Campbell 2016-10-28 In Jack Campbell's New York Times bestselling Lost Fleet series, Campbell's hero Captain Black Jack Geary explores the furthest reaches of space. Here, Campbell explores what kinds of problems mankind might face as our horizons expand. The third in a series of collections of Campbell's short stories includes some of Campbell's favorite stories, and some of his earliest. A brand new author's note accompanies each story. "Lady Be Good" is one of Campbell's most popular stories, winner of Analog Magazine's "AnLab" reader poll for Best Short Story and cited in Gardner Dozois' Year's Best SF. The Lady Be Good is an old ship, running obscure routes, not all on the right side of the law, with her loyal first officer Kilcannon and reclusive captain. When Kilcannon decides to rescue the survivors of an attack on a Vestral Company ship, a mysterious new passenger thanks him by asking difficult questions about the Lady, with unexpected answers. In "Kyrle Eleison," the Verio shipwrecked centuries ago on an out-of-the-way planet, and the descendants of the ship's survivors have gotten along as well as they can by following the orders that were passed on to them. But those orders weren't intended to govern life on the planet's surface, and when the Bellegrange arrives on a rescue mission, her captain will have to reckon with the unexpected social order on the planet. In "Do No Harm," a ship is so technologically advanced that it can repair itself--but turning over the keys might not be the best idea. And in "Down the Rabbit Hole," a series of failed attempts at faster-than-light travel lead to a novel approach: sending an untested Naval captain out in a space ship to see if he can figure out what's gone wrong. With eleven stories in all, AD ASTRA is the most multi-faceted introduction to the short fiction of Jack Campbell, and an essential complement to his bestselling book-length work.

Ad Astra: An Illustrated Guide to Leaving the Planet-Dallas Campbell 2017-10-05 'I could have done with a copy of Ad Astra in December 2015!' -Tim Peake 'A wonderful, wise and witty guide for space explorers everywhere.' - Richard Osman 'A must read both for intrepid space explorers and misty-eyed dreamers. Now, to space!' - Hannah Fry 'Few people are more knowledgeable, celebratory and witty about space travel than Dallas Campbell.' - Adam Rutherford Need some space? For almost all human history we've been firmly rooted to the Earth. And, sure, it's got some good things going for it: nice views, friendly inhabitants, good coffee. Air. But what if you want to get off? Whether you've got itchy feet and need a bit of a break, or you're looking for a complete change of scene, this book has all the information you'll need to leave, with FREE expert advice from the men and woman who can actually make it happen. Do I need a passport? How do I know if I have the right stuff? Can I take my dog? What spacesuit do I need? Where am I going to go? What am I going to eat? As well as being a deeply impractical guide to getting off the planet, this is an eclectic and beautifully illustrated mix-tape of space travel stories - both real and imagined. From the migrating lunar geese that flew us to the moon in the 1600's, to Elon Musk's wild plan to get humans to Mars en masse in the future; from the history of early rocket science to the Soviet tortoises that secretly won the space race. A collection for anyone who has looked up in wonder at the stars... And then wondered how to get there. The next best thing to actually heading off into space.' - Jim Al-Khalili 'Few people are more knowledgeable, celebratory and witty about space travel than Dallas Campbell.' - Adam Rutherford 'If, like me, you dream of going into space, this is definitely the place to start the journey.' - Dan Snow 'A must have volume for astronauts and armchair astronauts alike.' - Helen Sharman OBE 'Funny, factual and beautiful.' - Shaun Keavney 'Read it, make notes, and be ready when the day comes.' - Helen Czerski

A Passion for Space-Marianne J. Dyson 2015-09-18 Marianne J. Dyson recounts for us a time when women were making the first inroads into space flight control, a previously male-dominated profession. The story begins with the inspiration of the Apollo 11 landing on the Moon and follows the challenges of pursuing a science career as a woman in the 70s and 80s, when it was far from an easy path. Dyson relates the first five space shuttle flights from the personal perspective of mission planning and operations in Houston at the Johnson Space Center, based almost exclusively on original sources such as journals and NASA weekly activity reports. The book's historical details about astronaut and flight controller training exemplify both the humorous and serious aspects of space operations up through the Challenger disaster, including the almost unknown fire in Mission Control during STS-5 that nearly caused an emergency entry of the shuttle. From an insider with a unique perspective and credentials to match, this a must-read for anyone interested in the workings of NASA during one of its busiest and defining times, and the challenges faced by women pursuing scientific careers.

AD ASTRA PER ASPERA-HENRY WESTWOOD 2011-05-05 AD ASTRA PER ASPERA. The second book of the Hoille/Nuttall trilogy . Lord Pennywort was having to question his loyalties; to his alien friends whom he had served since his abduction in 1666, or to his new friends Vicky and Trevor who he greatly admired. Could he work with both to find a way forward and help the Earth find a new stability? The Earth was in turmoil following the ravages of plague; the population was decimated; utilities greatly diminished, and looting and riots were frequent. Vicky and Trevor were hoping that Lord Pennywort, with his powers, would work with the nations left to bring back some stability,but would this all be too much opening the way for the Sirusians to move to Earth? Would it end Trevor andVicky's hopes of going, Ad Astra, to the stars. This book is not just science fiction, it has love and romance,wickedness and murder, warmth and laughter and a good sprinkling of suspense. It will make the reader sit up and take notice; it is close to the truth!

Ad Astra-Michael Gingold 2019-09-10 Once upon a time - the 1980s - in a galaxy not really all that far away - New York - Michael Gingold started a collection of newspaper advertisements for the science fiction, fantasy, and horror releases that stoked his passion as a genre fan. Eventually, he would grow up to become editor-in-chief of the horror magazine Fangoria, plus a writer for numerous other genre publications, a screenwriter, respected author, and all-around expert for films frightful and fantastical. As the years went by, Michael held on to this collection of weird and wonderful art, eventually publishing the best-selling, horror-themed Ad Nauseam: Newsprint Nightmares from the 1980s and its sequel, Ad Nauseam II: Newsprint Nightmares from the 1990s and 2000s. And now he presents Ad Astra: 20 Years of Newspaper Ads for Sci-Fi & Fantasy Films, a year-by-year look at the movies that shaped many a childhood in the '80s and '90s. Inside this 270-page book, you'll find Star Trek to Starship Troopers, The Dark Crystal to Dark City, Blade Runner to The Running Man, RoboCop to Robot Jox, The Empire Strikes Back to Back to the Future, and many, many more. See alternate artwork for your favorite films, learn the fascinating behind-the-scenes stories of their marketing campaigns, and read the most entertaining and unexpected quotes from reviewers at the time all carefully curated by Michael. So throw on your jetpack as we travel back in time to when print was king and movie marketing was an art form for the ages!

The People of the Mist-Henry Rider Haggard 1894 The dwarf saluted and went. "Ah!" he said to himself as he waddled down the hill where he hoped to find game, "ah! you do not fear men dead or living--overmuch; yet, Otter, it is true that you are better here in the sun, though the sun is hot, than yonder in the cave. Say, Otter, why does Baas Tom look so awful now that he is dead--he who was so gentle while yet he lived? Cheat did not look awful, only uglier. But then you killed Cheat, and the Heavens killed Baas Tom and set their own seal upon him. And what will Baas Leonard do now that his brother is dead and the Basutos have run away?

Transcendence-Christopher McKitterick 2010-11 Humankind rushes toward self-destruction and must evolve or die. Our perspective: a scientist exploring an alien artifact on Triton, a teen-aged hacker in a city gone mad, three actors manipulated into igniting interplanetary war, the de-facto ruler of half the solar system, a soldier fighting in Africa to entertain his audience, an artificial intelligence facing personal crisis, and a cast of billions.--Publisher description.

Paperwork-Kevin McLaughlin 2011-06-03 "The Paper Age" is the phrase coined by Thomas Carlyle in 1837 to describe the monetary and literary inflation of the French Revolution—an age of mass-produced "Bank-paper" and "Book-paper." Carlyle's phrase is suggestive because it points to the particular substance—paper—that provides the basis for reflection on the mass media in much popular fiction appearing around the time of his historical essay. Rather than becoming a metaphor, however, paper in some of this fiction seems to display the more complex and elusive character of what Walter Benjamin evocatively calls "the decline of the aura." The critical perspective elaborated by Benjamin serves as the point of departure for the readings of paper proposed in Paperwork. Kevin McLaughlin argues for a literary-critical approach to the impact of the mass media on literature through a series of detailed interpretations of paper in fiction by Poe, Stevenson, Melville, Dickens, and Hardy. In this fiction, he argues, paper dramatizes the "withdrawal," as Benjamin puts it, of the "here and now" of the traditional work of art into the dispersing or distracting movement of the mass media. Paperwork seeks to challenge traditional concepts of medium and message that continue to inform studies of print culture and the mass media especially in the wake of industrialized production in the early nineteenth century. It breaks new ground in the exploration of the difference between mass culture and literature and will appeal to cultural historians and literary critics alike.

Saturn Run-John Sandford 2017-02-07 "The year is 2066. A Caltech intern inadvertently notices an anomaly from a space telescope—something is approaching Saturn, and decelerating. Space objects don't decelerate. Spaceships do. A flurry of top-level government meetings produces the inescapable conclusion: Whatever built that ship is at least one hundred years ahead in hard and soft technology, and whoever can get their hands on it exclusively and bring it back will have an advantage so large, no other nation can compete. A conclusion the Chinese definitely agree with when they find out. The race is on, and an remarkable adventure begins—an epic tale of courage, treachery, resourcefulness, secrets, surprises, and astonishing human and technological discovery, as the members of a hastily thrown-together crew find their strength and wits tested against adversaries both of this earth and beyond. What happens is nothing like you expect—and everything you could want from one of the world's greatest masters of suspense"-- Provided by publisher.

'Mars in a month' a possibility. A paradigm shift in space transportation, this book is an in-depth and compelling story co-written by its inventor. It traces the riveting history of the development of the VASIMR® engine. This landmark technology is grounded in concepts of advanced plasma physics. It cross-pollinates ideas and disciplines to offer a new, practical, and sustainable solution for in-space transportation beyond low Earth orbit in the decades to come. Invented by the co-holder of the world's spacelift record, astronaut Franklin Chang Diaz, the VASIMR® engine is developed by Ad Astra Rocket Company in its Texas facilities with NASA as part of the NextSTEP VASIMR® partnership. With adequate funding, the first spacelift of the VASIMR® engine is imminent. Plasma rockets feature exhaust velocities far above those achievable by conventional chemical rockets. The VASIMR® engine is the most advanced high-power plasma propulsion system operating in the world today and it may place long, fast interplanetary journeys withinour reach in the near future.

Adventures of a Cold War Fast-Jet Navigator-David Herriot 2017-10-30 David Herriot served almost 40 years in the Royal Air Force as a navigator, first on the Buccaneer S2 and subsequently on the Tornado GR1. This volume recounts his early career operating the Buccaneer on three operational flying tours plus a tour as an instructor on the Operational Conversion Unit. With almost 2500 hours on an aircraft that was operated at high-speed, in all weathers and at ultra low-level, his task in the rear seat was a demanding one. But Herriot was more than just the guy in the back of a Buccaneer; he was, quite routinely, and often to the exasperation of his seniors, the life and soul of any party that was taking place either at home base or when overseas defending the flanks of NATO.This is an epic adventure for the aviation enthusiast, particularly those with affection for the Blackburn Buccaneer, and is one that provides a great deal more than the usual introduction to a specific aircraft type and the people who flew it. Here the reader will find an absolute insight into life on a fast jet squadron, at work and mischievous play during the Cold War and they will be introduced to some of the modern Royal Air Forces greatest characters.

Ad Astra Per Aspera Et Per Ludum-European Association of Archaeologists. Meeting 2003 The study of astronomy in ancient societies is becoming ever more popular among archaeologists as is reflected in this collection of twelve papers been taken from a session held at the European Association of Archaeologists Eighth Annual Meeting held in Thessaloniki in 2002. It becomes clear that astronomy is considered as an important motivation for the construction of many monuments across the ancient world. Divided into three sections, the contributions discuss archaeological, and astronomical, evidence from ancient Egypt, prehistoric and Hellenic Europe and, in one paper only, Mesoamerica. In addition to examining specific monuments, sites and buildings, the papers discuss what these reveal about the cosmology and technical ability of a range of cultures. Supported throughout by astronomical diagrams.

Stellar Legacy-Kevin McLaughlin 2018-10-04 A wild jump into uncharted space saves the starship Satori and her crew from their near brush with death. With a badly damaged ship and injured crew, the planet with breathable air they find on the far side of their jump seems like a stroke of luck. But they quickly learn that they've only gone from one danger into another far greater threat. The planet they find is ruined, abandoned, and devastated by some long ago war. Was it once the home of the civilization that built the wormhole drive? What happened to them? As the crew begin their search for clues, they stumble across the remnants of a war a thousand years old and an enemy more terrifying than anything mankind has ever faced. Excerpt: "Oh," Beth said in a distracted voice. "Beth, what the heck is up with you?" Dan went beside her to see what she was looking at. She was watching a radar screen, showing the airspace around them. It was pretty easy to read. Satori was dead center on the screen, and everything in the air nearby showed up with a number next to it showing relative altitude. When he'd last looked at the screen, there was nothing except the occasional satellite passing overhead. That had changed. That had changed a lot. Something very large was flying into radar range, about thirty miles above them and coming down fast. As he watched, the object broke apart, smaller bits flying off. "Majel, what is it? Asteroid?" Dan asked. The larger object was still showing as about five hundred meters long and nearly half as wide. If it was a rock, it was going to make one hell of a crater, and they'd need to be long gone before it came down. "Negative," came the computer's answer. "Object is decelerating." This book is a heavily revised second edition of the original volume. The story length has been increased by about 20%, adding enormously more background to the characters and deepening of the personality of the world and crew. If you've already read the first edition, you won't need to read this version to catch up - but fans of the series are sure to enjoy this expanded and improved "Author's Preferred Edition"!

Toby Potts in the Temple of Gloom and Other Adventures of Our Intrepid Hero-David Osborne 2006 Toby Potts, fresh from Bar School, and clutching his graduation diploma, is a young, aspiring barrister, full of hopes and dreams and intent on becoming the leading criminal advocate of his time. He can hardly wait to get on his feet and impress the jury with his incisive cross-examination, his mastery of all things legal, and his spellbinding final speeches. Sadly, reality kicks in, and Toby finds the path to fame and fortune far from smooth and uneventful. His trials and tribulations take Toby from his Call to the Bar, his experiences in pupillage, his first brief when he represents the wrong client, through to his great moment of triumph when he represents Santa Claus at the Old Bailey, and many adventures in between. Chambers politics, strange clients, solicitors who come and go on a whim, and even stranger and eccentric judges, all have their part to play in Toby's climb up the greasy pole. Moments of courtroom drama, and many more moments of high farasco, mark Toby's initiation into the heady world of the Criminal Bar. So much to learn, so little time. Will Toby succeed where so many have failed? He has the determination, he has the self-belief, but does he have what it takes to reach the pinnacle of the profession? Only time will tell. One thing is certain - never a dull moment! Why be ordinary, Toby was once told, if you have it in you to be extraordinary? Reviews "Toby is a marvellous character and had me laughing out loud" "Here we have all the hallmarks of a great British comedy, but with a fresh approach" "Very good, intelligent writing - lighthearted and funny" "Osborne is a very amusing writer with a light touch"

Children of God-Mary Doria Russell 2007-12-18 In Children of God, Mary Doria Russell further establishes herself as one of the most innovative, entertaining and philosophically provocative novelists writing today. The only member of the original mission to the planet Rakhata to return to Earth, Father Emilio Sandoz has barely begun to recover from his ordeal when the So-ciety of Jesus calls upon him for help in preparing for another mission to Alpha Centauri. Despite his objections and fear, he cannot escape his past or the future. Old friends, new discoveries and difficult questions await Emilio as he struggles for inner peace and understanding in a moral universe whose boundaries now extend beyond the solar system and whose future lies with children born in a faraway place. Strikingly original, richly plotted, replete with memorable characters and filled with humanity and humor, Children of God is an unforgettable and uplifting novel that is a potent successor to The Sparrow and a startlingly imaginative adventure for newcomers to Mary Doria Russell's special literary magic.

The Surprising Adventures of Baron Munchausen-Rudolf Erich Raspe 2015-09-16 Meet the Baron of Lies! "Whether such things are or are not the intentions of the Baron the reader must judge." - Rudolf Erich Raspe, The Adventures of Baron Munchausen The Adventures of Baron Munchausen is a collection of fantastic stories told by the Baron himself. The Surprising Adventures of Baron Munchausen-Rudolph Erich Raspe 2014-05-25T00:00:00Z Baron Hieronymus Karl Friedrich, Freiherr von Münchhausen, was an actual baron living in 18th-century Hanover famous for entertaining his guests with outrageously-embellished tales of his wartime exploits—so much so that his nickname in German is Lügenbaron, or “Baron of Lies.” When Rudolph Eric Raspe, a writer and scientist living in England, heard of the Baron’s tales, he wrote his own versions centered around a fictional Baron Munchausen. While the real Baron wasn’t amused to have his name attached to a silly character famous for his bald-faced lies, Raspe’s tales became hugely popular, reprinted for hundreds of years and illustrated just as many times. These very short tales were originally intended as contemporary satire, but their outrageous silliness is still entertaining today. This book is part of the Standard Ebooks project, which produces free public domain ebooks.

The Surprising Adventures of Baron Muchausen-Rudouls Erich Raspe 2013-04-29 Baron Munchausen was a real German adventurer known for his fondness for tall tales and exaggeration. But the exploits that Rudolf Erich Raspe attributed to him in his book, which he first published in London in 1785, quite clearly drew on folklore and on Raspe’s own whimsical inventiveness. The Baron’s escapades include a balloon expedition to visit the King of the Moon, an encounter with the goddess Venus, a battle with the Turkish army, and an enormous sea creature who swallows him up in the South Seas.

The novels recounts the adventures of the German boy Wilhelm Heinrich Sebastian Von Troomp, who goes by "Baron Trump", as he discovers weird underground civilizations, offends the natives, flees from his entanglements with local women, and repeats this pattern until arriving back home at Castle Trump. The novels have recently received media attention, relating similarities between the protagonist and the U.S. President Donald Trump, whose son is also named Barron Trump.

Out of This World Adventures-George Griffith 2020-09-15 These three sci-fi novels from the dawn of the twentieth century are among the first works of fiction to imagine visiting other planets. A Honeymoon in Space: Lenox, the Earl of Redgrave, has invented a flying ship with the power to break free of Earth’s gravity. But before taking to the stars, he has some personal business to attend to—namely, wooing an old flame. The lady in question is Zaidie, a woman about to be forced into a loveless marriage. Stealing her away, Lenox takes her out of this world. George Griffith’s accounts of other planets are spectacularly imaginative—from subterranean civilizations on the moon to the warlike Martians to the musical inhabitants of Venus. A Journey in Other Worlds: This philosophical sci-fi novel by John Jacob Astor follows a stockholder of the Terrestrial Axis Straightening Company across the solar system. On Jupiter, Astor creates a world of gushing volcanoes, crashing waterfalls, and otherworldly flora and fauna. In contrast, his Saturn is an introspective land. Astor’s vision of a future with levitating trains, a police force equipped with cameras, and an interconnected network of phones, solar power, wind power, and air travel is astonishingly prescient. A Princess of Mars: An Arizona prospector, John Carter suddenly finds himself transported to Mars in the first novel of Edgar Rice Burroughs’s Barsoom series. The shift in gravity gives Carter superhuman powers—and he’ll need them! The red planet, called Barsoom by its inhabitants, is in the grips of civil war. To save the legendary Princess Dejah Thoris, Carter must defeat legions of giant, four-armed, green barbarians and travel thousands of miles across a landscape populated with monstrous flora and fauna.
